REPORT ON THE ANALYSIS AND PROPERTIES OF QUIBELL'S DISINFECTANT. CAPE TOWN, Feb. 12th, 1898.

It possesses remarkable healing properties as a lotion for wounds and old sores ; when used for this purpose it should be sufficiently diluted with water, at least one in 200 parts of water. I have made numerous experiments with a view to ascertaining the disinfecting power of this compound, and found that it completely destroys all germs of putrid fermentation in animal and vegetable substance when it is mixed with even 120 to 130 parts of water. I found its strength equal to that of the best disinfectants used in South Africa, and I can strongly recommend Quibell's as a powerful Disinfectant.

(Signed) P. DANIEL HAHN, Ph. Dr. M.A., *Professor of Chemistry.*
